| <b>Astigmatism*</b>                                                                                                                                                             | <b>+1,998</b>                      |                             |                                     |

Note:

1. All above illustrations are artist's impressions and are only for comparison purposes. Actual visual results will vary between individuals.

2. While majority of multifocal patients achieve independence from glasses for most activities, glasses may be needed for long periods of reading and small text.

3. Even with the best lens implanted, you will still experience some form of glare & halos as the artificial lens will never be as good as your natural lens.

\* A comprehensive eye examination will allow the surgeon to suggest the most suitable procedure for you based on the conditions of your eyes.

\* Basic Mono-focal Package: RM3,998/eye

**UPGRADE**  
**AI-Assisted**

since 2011  
**NO-BLADE**  
**CATARACT SURGERY**

**Add**  
**RM 3,998** /eye

VISTA's **AI No-Blade Cataract Surgery** uses a femtosecond laser (used in No-Blade LASIK since 2005) to replace many steps performed manually by a surgeon, resulting in a great level of precision, safety and results for patients.
